SPRAYCLEAN DUO-PAK MERV 8

Bulletin No. PB-798-7

SPRAYCLEAN DUO-PAK MERV 8 POCKET FILTERS, the 3-ply construction, is designed for extended filter life to reduce change frequency, and superior efficiency for improved process control.

SPRAYCLEAN DUO-PAK MERV 8 POCKET FILTERS utilize our exclusive new multi-denier media, and are available in one, two and three pocket configurations to provide optimum life in the most rugged conditions. This progressive density media is enhanced with an adhesive coating, specially formulated to provide exceptional holding capacity and prevent unloading. The features of the D-PAK MERV 8 also make it an ideal choice as a secondary filter in paint overspray collection systems, where superior fractional efficiency and particle retention is essential to meet MACT guidelines.

SPRAYCLEAN DUO-PAK MERV 8 POCKET FILTERS have an average efficiency of 99%+ @ 3 microns, meeting proposed standards for filter efficiency with today's products. The superior protection provided by this level of efficiency will increase the service life of secondary filters, and protect equipment and process controls from contamination.

PRODUCT PERFORMANCE DATA	
TEST AIR FLOW	2000 cfm
INITIAL PRESSURE DROP	0.18" wg
DUST HOLDING CAPACITY	198 grams per sq. ft. of media area
RECOMMENDED FINAL RESISTANCE	1.00" wg
FRACTIONAL EFFICIENCY @ 3 MICRONS	99.5% Average
@ 5 MICRONS	100% Average
FILTER CONSTRUCTION	100% bonded synthetic media with tackifier, and self-seal, internal header.
