

Oval Replacement Filters

Koch oval replacement dust collector filters

FEATURES

Superior filtration efficiency achieved with ICF15 (Nano-Fiber).

Low pressure drop and extended filter life.

Seamless gasket- eliminate downstream dust bypass.

Pleat Lock- ensures media from bunching and uniform spacing.

Tailor fit filtration medias to your applications

Direct replacement fit to all Donaldson® style oval filters.

Oval Replacement Filters

Koch Filter oval replacement filters are manufactured to fit all Donaldson/Torit® Downflo® oval shaped dust collectors. Additional oval filter replacements for Bystronic®, Gema®, Nordson®, Sulzer-Metco®, Oerlikon-Metco® and Pangborn® oval shaped dust collectors.

Koch Filter offers a wide variety of filter media grades from our ICF12 (80/20 cellulose/ polyester blended) to our ICF15FR (nano-fiber w/Fire retardant finish), rated MERV 15. Should your application require a durable and washable filter media, Koch Filter also can offer our ICF11SB (100% spun bond polyester) with additional options for Hydro-oleo phobic or Metalized (anti-static) and ePTFE membrane (MERV 16).

Koch Filter can also customize our oval replacement filter by the number of pleats, media and pleat support design for your oval dust collector for solutions extending the lifetime cycle of the filter and reducing change-outs.
