

Flat Cell Cartridges

Dust collection filters

Flat Cell Cartridges

Koch Filter has earned air filtration industry recognition as a world leader aftermarket supplier of dust collection air filters. Our filters have been successfully installed in thousands of dust collectors.

You'll find our filters in all environments, even the harshest and challenging. Innovative product introductions, ISO 9001 manufacturing facilities, application-specific solutions and extensive field and laboratory filter testing gives Koch an unique advantage over other suppliers.

Designed to fit Wam[®] Silotop and Hoppertop. 100% spunbond polyester available to meet your requirements.

FEATURES

Low resistance to airflow increases energy savings

Eliminates corrosion and rust

Designed for high moisture and humidity

Media Options

ICF 11SB-HO	100% Polyester Spunbond with HO (Hydro-oleophobic) finish Treated version of spunbond utilizing a proprietary coating that resists moisture and hydrocarbons and enhances dust release.
ICF 11SB	100% Polyester Spunbond High-strength, 100% synthetic spunbond media with excellent durability, particulate release and moisture resistance.
ICF 11SB-ME	100% Polyester Spunbond with ME (Aluminized anti-static) finish High-strength, 100% synthetic spunbond media with excellent durability, particulate release and moisture resistance. Contains an aluminized anti-static coating.
ICF 16SB-TX	100% Polyester Spunbond with TX (ePTFE membrane) Ultimate in strength and filtration efficiency, the ePTFE membrane also enhances dust release for superior cleaning.
